

Laura Carrara

KEY-WORDS:
 OFFICIAL CONTROLS · REGULATION
 (EU) 2017/625 · IMSOC

PROFILE

I am a lawyer and a second-year PhD student in Agrysistem. Thanks to several international experiences (Europe and UK) I learnt the value of hard working and networking.

PROJECT TITLE

From Regulation (EU) 2017/625 to EU and national implementation measures national enforcement measures: an innovative but not concluded

Steps of the research

- Focus on Italian implementation legislation
- The coordination electronic system of the authorities (Italian - European – International)
- The right and obligation of the Operator in case of controls

Main Results

I have written a book on PDO and PGI food titled “Prodotti alimentari di qualità. Regole, casi e questioni” so I've been able to learn more about the controls on this field

Research Contribution

My aim is to create a guide for FBO and food consultant to understand the system of new official controls based also on the Italian implementation system

Collaborations

On going

Why should you care?

Are you a food operator, consultant, or researcher on food issues? Impossible for you not to come across the controls. European and Italian legislation is fragmented; my work will help you understand how the system works.
