## Reference Contact

Dott. Luca Leone

## PROJECT TITLE

### Novel Foods, Reg. EU 2015/2283. Procedures and challenges

#### Steps of the research

- Tools for the identification of novel foods and collection of legal requirements for their introduction into the European market.
- How to develop a successful Novel Food dossier: the case of microalgae.
- Data protection and transparency, the reform introduced by Reg. (EU) 2019/1381.

#### Research Contribution

Analysis of the recently developed regulatory framework on novel food and its implementation, with a view of identifying the main controversial aspects of the discipline and highlighting the potential for innovation in the food sector.

#### Collaborations

European Projects:

- CAMELMILK 'Boost the production, processing and consumption of camel milk in the Mediterranean basin' (PRIMA)
- PROFUTURE 'Microalgae protein-rich ingredients for the food and feed of the future', (H2020)
- EcoeFISHent 'Demonstrable and replicable cluster implementing systemic solutions through multilevel circular value chains for eco-efficient valorization of fishing and fish industries side-stream' (H2020)

#### Why should you care?

Novel Foods can be an innovative, sustainable and accessible livelihood source. Their production can contribute to the implementation of the European Green Deal and the achievement of the objective of zero hunger.
