

# AINOMUGISHA JULIET

KEY-WORDS:  
FOOD SECURITY · MALNUTRITION ·  
RURAL DEVELOPMENT

## PROJECT TITLE

**Food security in low-income countries: nutritional and ethical aspects.**

## PROFILE

Agronomist and plant pathologist, with a Master of Science in Food and Agricultural Economics. Currently, I am a second-year PhD student specialising in food security, malnutrition and rural development.

## AFFILIATION

Department of Animal science, Food and Nutrition (DIANA)  
Università Cattolica del Sacro Cuore

## LANGUAGES

Native speaker

Level B1

## Steps of the research

- Innovation of strategies to improve food security and reduce malnutrition.
- Implementation of chosen strategies in the countries affiliated to the project; India and Democratic Republic of Congo.
- Data collection and assessment of the implemented strategies.

## Research Contribution

The obtained results will supplement the research into improvement of food security and reduction of malnutrition in developing countries. Through real-life implementation of these strategies, their impact will be accurately assessed, which will contribute to the replicability of the chosen strategies in rural areas of other countries.

## Collaborations

- Produzione di cibo appropriato: sufficiente, sicuro e sostenibile (Progetto C3S)  
Prof. Giuseppe Bertoni

## HOW TO REACH ME

Email Address:  
juliet.ainomugisha1@unicatt.it

## Reference Contact

Prof. Giuseppe Bertoni

## Why should you care?

Despite ongoing efforts, global food insecurity is increasing. In 2021, approximately 29.3% of the world population faced moderate food insecurity and 11.7% faced severe food insecurity. Food security is directly linked to malnutrition and poverty. Therefore, achieving the food security dimensions (availability, accessibility, stability and utilisation) in rural areas of low-income countries contributes to the reduction in poverty, hunger and malnutrition.
