

## **Advanced Corporate Finance (Prof. E. Croci)**

The course is designed to introduce students to empirical research in corporate finance and governance. The availability of data to test hypotheses and theories in corporate finance is growing dramatically. In this course, students will become familiar and work with some of the main datasets used in empirical research and apply some of the main methods used to analyze them. We will devote time to study selected prior empirical works, chosen to make students work with specific datasets and methods. Students will be asked to replicate or extend some of these studies. Students are expected to have at least a preliminary knowledge of Stata (or other statistical software).

The grade will be based on:

1. Participation (30%)
2. Paper presentation (35%)
3. Two assignments during the course (35%) (These assignments will require Stata)

## **Schedule**

TBD

## **Reading list**

\* denotes paper to read before class.

### **Session 1.**

#### **Ownership structures: Large shareholders**

\*Aminadav, G. and E. Papaioannou (2020), Corporate control around the world. *Journal of Finance*, 75(3), 1191–1246.
